Advanced Diesel Purification Mobile tank cleaning system

Clean your fuel and your tank without having to dispose of all of that precious diesel fuel, just because your fuel is polluted with bacteria, corrosion and water! Instead you can turn it into clean, valuable, ready to use diesel with help of the Micro-Separator mobile cleaning unit!

Capacity: up to **1,000 ltr. per hour**

Cleaning process in 3 stages:

- 1) MFC-750 Micro Separator
- 2) Magnetic stabiliser with bacterial control
- 3) Fuel filters with filtration to 25 μ m

The mobile  tank cleaning system comes with 2 flexible hoses with a length of 3 meter each. A wall mounted version is also available.

Both units come with a valve under the separators to drain the water, bacteria and pollution. A built-in alarm switches the unit off in case the fuel filters would get clogged. The fuel filters also have an indicator which shows the condition of the filter. The housing of the unit is powder coated.

Dimensions: L X W X H = 40 x 40 x 80 cm. (excl. handlebars)
Required electrical power: 230 Volt/ 750 Watt. Weight appr. 60 kgs.

Units can also be rented per day
